

Mapping, Aerial Photography & Height Data

Product Range Overviews

Aerial Photography

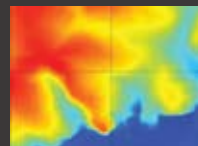

Aerial photography allows you to visualise your site's location, enabling you to clearly identify access points, surrounding areas, boundaries, road layouts and other features. Aerial imagery is provided by a wide variety of suppliers including Getmapping and Bluesky, giving you access to current and historical photographs in a range of formats for use in GIS and CAD applications.

Current Mapping

The addition of current mapping gives context to any project by providing an overview of the features existing on and around your site. Five scales of mapping are available, ranging from 1:1,250 to 1:250,000 scale. You can select the scale and format of mapping to suit your site, for inclusion in report documents or for use in GIS and CAD applications.

Height Data

The provision of accurate height information for use in GIS and CAD applications enables you to build a clear 3D picture of a particular area and its natural and built environment. Height data offers a valuable tool in advanced site analysis, planning and modelling applications and effective environmental analysis that is reliant on flood risk and subsidence modelling.

Benefits

- **Flexible** – Only buy the data you need for your project.
- **High quality**
- **Comprehensive** – All current mapping, aerial photography and height data available in one place.
- **Legal** – All data is fully licensed for commercial use, under a single managed licence, with automatic expiry reminders.

Applications

- Current Mapping products help to put your site into context and will greatly improve the presentation of your environmental desk studies.
- The Aerial Photography products available from Landmark will aid professionals in carrying out Site Assessments, Desk Analysis and any environmental studies you carry out as part of your Phase 1 Due Diligence process.
- Height Data including contours, digital terrain models and digital surface models is valuable for use as part of detailed site analysis, planning and modelling.

How to order?

To order any Mapping, Aerial Photography or Height Information products or to find out more information on any of our other products and services, please visit **www.envirocheck.co.uk**. If Envirocheck does not provide what you need, please contact your dedicated Account Manager or call Customer Services on **0844 844 9952** to discuss a bespoke solution for your business.
